Présentation de l'éditeur

Cities are growing faster than ever before, but why? Because they foster proximity. Nearness to work, friends and culture has always been a driving force in urban development. Alexander Stahle's Closer Together explains the political and economic forces and the subcultures that drive change in terms of urban environment and transport, as well as the way cities need to transform in order to bring people closer together and, not least, the way it will bring about greater equality and prosperity.
